5 July 1962

MEMORANDUM FOR: Executive Director

SUBJECT: ORGANIZATION

25X

The Deputy Director (Research) is unable to coordinate the proposed organization directive in the latest revision of HN 1 - for the following specific reasons:

a. Paragraph 1. The Deputy Director (Research) considers that the research and development mission outlined in this paragraph is essentially as indeterminate as the version contained in the original HN 1 - of several weeks ago. As you are well aware, we have been unable to convert that directive language into any definitive decisions or actions. Until this subject is clearly defined, with statements concerning the transfer of funds, personnel, projects, etc., I believe we will be unable to proceed on any definitive agreements between the Deputy Directors involved.

25X1 b. Paragraph 2. The last sentence should be removed and be replaced by one which states "All ELINT activities, including funds, manpower authorizations, and materiel of the Deputy Director (Support), Deputy Director (Plans), and Deputy Director (Intelligence) will be transferred to the Deputy Director (Research) as soon as possible and no later than 15 August 1962". This paragraph should also contain the appointment of as Assistant Director of the Office of ELINT.

c. Paragraph 3. No comment, except that I should like to know what decisions have been made on and the T/O.

25X

d. Paragraph 4. No comment, except that such a "request" is unlikely to produce much action until the responsibilities are more clearly defined.

e. Paragraph 5. This should be rewritten to authorize the establishment of a Scientific and Technical Career Council under the guidance of the Deputy Director (Research), since it is infeasible to establish such a career service when the major scientific and technical components are not under DD/R control.

25X1

HERBERT SCOVILLE, Jr.
Deputy Director
(Research)
